This paper is to summarize the telephone conversation between Examiner Michael Goldman and Primary Examiner Jean Janvier, of the US Patent Office and Pete Tormey of Swernofsky Law Group. The telephone conversation was held at 1 PM Eastern time on October 15, 2008.

The conversation started with Pete Tormey asking about the Examiner taking official notice of performance monitoring techniques while rejecting claims in the present application (Office action date 7/25/08) page 5). The Examiners pointed out that the text of claim 1 referring to a connection parameter was not well defined and they believed that the official notice applied. After discussing possible ways the specification could show more detail on the "connection parameter", the Examiners

indicated a willingness to withdraw the final rejection if that portion of the claim text was properly amended.

Respectfully submitted,

Dated: October 20, 2008
